

In Memory of Dr. Stephen Harrison

It is with great sorrow that we mourn the untimely passing of our friend and colleague, Stephen Harrison, MD. Dr. Harrison was a beacon of inspiration and professionalism who left an indelible mark on all of us who had the privilege of working alongside him. He was one of the pioneers in the field of MASLD and MASH and has made extensive contributions to the field of hepatology more broadly. His dedication, expertise, and unwavering commitment to excellence set a standard for all of us to follow.

Beyond his impressive achievements, he was a thoughtful and generous person who embodied what we should all aspire to be as human beings. He was the kindest of friends, and he was loyal, positive, reliable, and hardworking. Despite his indisputable success and contributions, he remained humble and caring. The void left by his departure is immense, and while he will be deeply missed by many of us, he will never be forgotten. Our deepest condolences go out to his family, his wife, Renee, daughter, Anna-Lauren, and son, Taylor for their profound loss.
